

Swimming Pool Chemicals Swimming Pools

Product Name	Packaging Size	Description
SATTE Chlorine-90	4 kg bucket	Water disinfection and treatment Swimming pool sanitization General sanitation in healthcare, agriculture, and industrial settings
SATTE Chlorine-65	5kg	Water disinfection and treatment Swimming pool sanitization General sanitation in healthcare, agriculture, and industrial settings
Anti-stain Plus	5 L jerrycan	Prevents & Removes Stains: Effectively controls metal and mineral staining on pool surfaces. Protects Pool Finish: Safeguards tiles, liners, and equipment from discoloration and scale buildup. Enhances Water Clarity: Keeps water clear by binding and removing stain-causing particles.
SATTE pH Minus	5 L jerrycan	Purpose: Lowers the pH of swimming pool water to the ideal range (7.2–7.6) for swimmer comfort, chlorine efficiency, and prevention of scaling or cloudy water. If pool pH is above 7.6 it is too alkaline and must be decreased by the addition of pH
SATTE pH Plus	5 L jerrycan	Rapid Low pH Adjuster – For Balanced Water Chemistry Maintains pool pH between 7.2 and 7.6 for optimal chlorine efficiency, swimmer comfort, and protection of pool equipment.
SATTE Algaecide	5 L jerrycan	Effective in preventing and controlling algae growth in swimming pools. Keeps water clear, clean, and safe for swimmers. Enhances chlorine efficiency by removing algae that consume chlorine. Regular use helps protect pool surfaces and equipment from algae damage.
SATTE Flocculant	4 kg bucket	Water clarification and sediment removal Swimming pool water polishing Solid-liquid separation in municipal, agricultural, and industrial wastewater treatment
